New Jersey Schools Development Authority Announces Gloucester Township School District to Receive \$7.5 Million in Grant Funding for School Improvement Projects

Trenton, NJ – In support of the Murphy Administration’s commitment to ensuring students receive a world-class education in a first-rate learning environment while relieving the pressure on local taxpayers, the New Jersey Schools Development Authority (SDA) today announced that 12 grants have recently been executed for the Gloucester Township School District through the SDA’s Regular Operating District (ROD) grant program. Grant execution signifies completion of the application process and the start of funding being issued to school districts through the SDA’s ROD grant program.

“Through our partnership with local school districts, this funding helps to ensure all students and school staff members across the State have access to high-quality learning environments that support positive learning outcomes. By addressing important school building upgrade projects, we are creating safe, healthy facilities for generations of young learners,” said SDA CEO Manuel Da Silva.

These grants are part of the \$450 million in grant funding announced by the SDA and New Jersey Department of Education in September 2023. Funding for this school construction initiative was made possible through legislation and grant funding from SDA allocations. Between state and local contributions, the total project costs of the eligible projects across the state are estimated to exceed \$1 billion. This significant investment impacts hundreds of local communities around the state by helping districts leverage resources to pay for important school facility projects while continuing to bolster the State’s construction industry.

The projects in Gloucester Township School District represent nearly \$15.8 million in total estimated costs including state grants of \$7.5 million, which leverages the local contribution of more than \$8.2 million. The SDA has executed nearly \$14.7 million in grants to the Gloucester Township School District since the start of the State’s school construction program.

The grants will provide funds for:

- Replacement of the air handling unit for the gymnasium at Blackwood Elementary School
- Replacement of the air handling units for the gymnasium and locker rooms at the Charles W. Lewis Middle School
- Replacement of the air handling units for the gymnasium at Erial Elementary School
- Improvements to the air handling units for the gymnasium and the locker room rooftop unit at Glen Landing Middle School
- Replacement of classroom unit ventilators at Glen Landing Middle School
- Replacement of air unit for the gymnasium at James W. Lilley Elementary School
- Replacement of air handling units for the gymnasium at Loring Flemming Elementary School
- Replacement of chiller plant at Ann A. Mullen Middle School
- Replacement of rooftop unit for the gymnasium at Ann A. Mullen Middle School
- Replacement of rooftop unit for multipurpose room at Glendora Elementary School
- Replacement of air handling units for the gymnasium and auditorium at Gloucester Township Elementary School
- Replacement of air handling units for the gymnasium at Union Valley Elementary School

The state-grant program funds at least 40 percent of eligible costs for projects in the RODs, addressing health and safety issues and other critical needs.
